

Dear Ma'am/Sir,

Good day.

I am writing to apply for any available **IT-related position** in your organization. With my experience in IT support, system administration, website management, and technical operations, I am confident in my ability to contribute effectively to your team.

In my previous role, I was responsible for maintaining and supporting computer systems, setting up user accounts, troubleshooting hardware and software issues, and performing system updates and upgrades. I also handled server, VPN, and security-related tasks to ensure stable and secure IT operations.

In addition to IT support, I have experience in website and WordPress management, including building and maintaining landing pages, managing hosting and domains, installing plugins, and resolving both front-end and back-end issues. I also worked with email systems, SEO content, and digital campaigns to support business operations.

I am highly organized, dependable, and able to adapt quickly in fast-paced environments. I take pride in solving technical problems efficiently and providing excellent support to both internal teams and customers.

I would welcome the opportunity to bring my skills and experience to your company. Thank you for your time and consideration. I look forward to discussing how I can contribute to your IT team.

Sincerely,

Jusan Singson

JUSAN B. SINGSON
